

Original Equipment Manufacturer (OEM) Supplying EEE Parts

Seller is advised that the parts being procured are considered Electronic, Electrical, and Electromechanical (EEE).

For the purposes of this clause, the term Original Equipment Manufacturer (OEM) is defined as a company that is the design authority for products, which it manufactures and assembles from purchased EEE parts, and sells those products under the company's brand name.

Seller shall immediately notify Buyer's Authorized Procurement Representative if Seller does not meet all of the following:

- Seller is the OEM of the equipment in which these EEE parts are used.
- Seller procures the EEE parts in accordance with the same procurement practices as the EEE parts contained in their OEM equipment, including maintaining EEE part traceability records in accordance with AS5553 and any government regulations imposed by this contract.
